

Ditching.

Working safely around our facilities

To ensure our pipelines and facilities operate safely, written consent from TC Energy must be obtained in Canada before any of the following:

- Constructing or installing a facility across, on, along or under a TC Energy pipeline right-of-way.
- Conducting ground disturbance (excavation or digging) on or within the prescribed area (30 metres or 100 feet from the centreline of the pipeline).
- Driving a vehicle, mobile equipment or machinery across a TC Energy pipeline right-of-way outside the travelled portion of a highway or public road.
- Using any explosives within 300 metres or 1,000 feet of TC Energy's pipeline right-of-way.

Before ditching:

Make a locate request either online (www.clickbeforeyoudig.com), via mobile apps (Saskatchewan and Quebec) or via phone. The One-Call centre will notify owners of buried utilities in your area, who will send representatives to make these facilities with flags, paint or other marks, helping you avoid damaging them.

Apply for written consent using TC Energy's new online application form (writtenconsent.tcenergy.com or call 1-877-872-5177). Often written consent for minor activities can be obtained directly from a regional TC Energy representative through a locate request.

What is the prescribed area?

The prescribed area extends 30 metres on either side of the pipeline centreline. Ground disturbance within this zone requires written consent. Contact your local One-Call centre to request a locate and TC Energy will come to the site and mark the pipeline. The existence of the prescribed area does not necessarily mean development of the land cannot occur within the prescribed area.
