

# Do work that really matters.

Millions of people count on us to deliver the energy that they need every day.

As a valued member of our team, you'll be doing exciting work that drives our business. You'll be asked to participate in decision-making and will learn about the business by working closely with other skilled people at TC Energy. Every day will enhance your knowledge, skills and passion for what you do.

You'll be hands-on with an inclusive, collaborative team. And with real meaningful work and exciting challenges, this may be the first job of your career – and the start of an amazing future.

WE WANT YOUR ENERGY.

Not all student programs are the same.

Are you up for the challenge?

We're counting on students like you to fuel the world's energy needs.

I found myself working on projects that were valuable to other teams and supported the work they were carrying out.

MADISON H.  
TC Energy Summer Student

At TC Energy, we engage our students and new grads in the very core of our operations — it's real work experience with real impact. Our student programs ensure you put your skills to work, gain valuable insight, contribute to the team, and work with mentors.

# The program that's right for you.

## Co-op and Internships

We're looking for students enrolled in specific fields of study. Our Co-op programs typically range from 4 to 16 months, with start dates in January, May or September.

## Summer Students

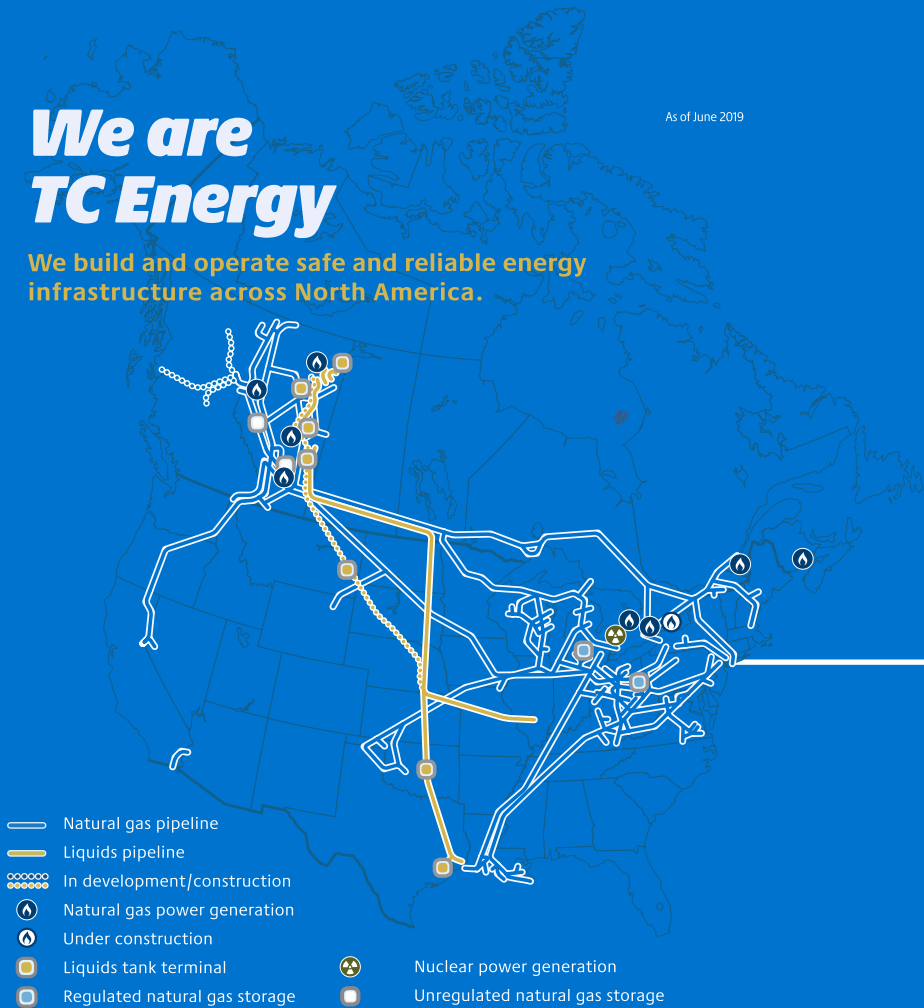

We have a diverse range of opportunities available for students. Programs range from 3 to 4 months, with start dates in May or June.

## New Graduates

Fresh out of school? Our New Grad Program includes Engineer-in-Training (EIT), business, field and technical roles. Openings are posted in September.

# We are TC Energy

We build and operate safe and reliable energy infrastructure across North America.

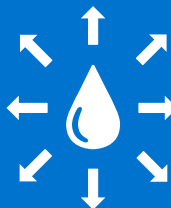

~6 MILLION  
Our power generation facilities have enough capacity to power approximately six million homes.

\$22.5 MILLION  
INVESTED IN 1,600+ NON-PROFITS  
Giving back to our communities is an essential part of being a good neighbour, a trusted community partner and employer of choice.

92,600 kms  
Our 92,600 km (57,100 mi) network of natural gas pipelines, supplies clean-burning natural gas across North America.

2 BILLION+  
BARRELS DELIVERED SAFELY  
Our 4,900 km (3,000 mi) liquids pipeline system connects growing continental oil supplies to key markets and refineries.

# What you'll get out of the deal.

We're looking for students and new grads who like challenges. As part of the TC Energy family, you'll be able to:

- grow your real world skills
- gain industry insight from experienced mentors
- be part of a tight knit and supportive team
- build your professional network
- create positive change in the community

Be part of a company that is guided by integrity and responsibility and provides a safe and collaborative environment for all.
