Dear Stakeholder:

Subject: Update on TransCanada's Vaughan Mainline Expansion Project

TransCanada hosted a Pre-Construction Open House on November 2, 2016 to share information about the construction process for the Vaughan Mainline Expansion (VME) Project. We understand that not everyone who is interested in the project may have been able to attend the event. As such, we would like to take this opportunity to share some of the highlights and feedback received during the Open House and, at the same time, provide an update on the project.

Approximately 20 people attended the Open House, representing a range of interests including landowners, municipal staff, local residents, community groups, and local contractors. The Open House was advertised in the Vaughan Citizen newspaper and invitations were mailed to nearly 1000 residents and other interested stakeholders. During the Open House, TransCanada presented information about the project including the following topics: pipeline routing; stages of pipeline construction; what to expect during the construction process; pipeline safety and maintenance; emergency planning and response; environmental protection; and aboriginal and stakeholder engagement. The project team was available to answer questions and receive comments.

Discussions during the Open House focused primarily on construction impacts and timelines in relation to specific landowner properties. In addition, questions were posed related to pipeline safety and integrity measures, environmental impacts, and coordination of construction with adjacent infrastructure projects.

Installation of road access and signage began in mid-November and clearing and grading work commenced the week of November 21. Beginning in early 2017, TransCanada will be issuing Construction Newsletters to inform local residents of anticipated impacts, provide schedule updates, and explain how to contact us with any concerns.

If you have any questions or comments on the project or upcoming construction, please do not hesitate to contact us at 1.844.933.0960 or vaughan_mainline@transcanada.com.

Yours truly,

Nelson Jalotjot
Project Manager, TransCanada
