

Wisconsin Access Project

ANR Pipeline Company's (ANR) proposed Wisconsin Access Project (WIA or Project) will provide a much-needed natural gas supply path from along ANR's Southwest Mainline and the Joliet Hub to critical utility and manufacturing markets throughout Wisconsin.

The Project, as proposed, will take place almost entirely on ANR's existing footprint in Wisconsin including:

- A certificated capacity increase.
- Minor modifications at the Rhinelander, Mosinee, Suring, Lena, Coleman, Meeme, and Two Rivers meter stations.

In service is anticipated as early as November 2022. As applicable, TC Energy will consult with landowners and local communities along the ANR footprint.

Anticipated Project Schedule

March 2021	FERC filing
May 2022	FERC certificate
November 2022	Project in service

For over 65 years, TC Energy has proudly delivered the energy that millions of North Americans rely on to power their lives and fuel industry. Guided by our values of safety, responsibility, collaboration and integrity, our more than 7,000 people are deeply rooted in their communities and ensure that we develop and operate our facilities safely, reliably and with minimal impact on the environment. We are committed to listening to our neighbors and we work with all our stakeholders to develop better project plans and create long-term opportunities and economic benefits in the communities where we operate across the United States, Canada and Mexico.
