

TransCanada

Alberta's Powerful Option

TransCanada's Power Assets in Alberta

TransCanada is an established and growing player in the North American power market.

TransCanada is a leader in the responsible development and reliable operation of North American energy infrastructure. Our Energy division's Power business is one of the fastest growing and most profitable in Canada. Including projects under construction, TransCanada owns, operates and/or controls, more than 10,500 megawatts (MW) of generating capacity in Canada and the U.S.

We continue to seek growth and long-term success through acquisitions and greenfield opportunities in North American electricity markets where we have a competitive advantage. Our power portfolio is primarily low-cost, base load generation and/or generation backed by secure, long-term power sale agreements.

TransCanada offers a number of power products for large commercial, industrial, and oil and gas customers.

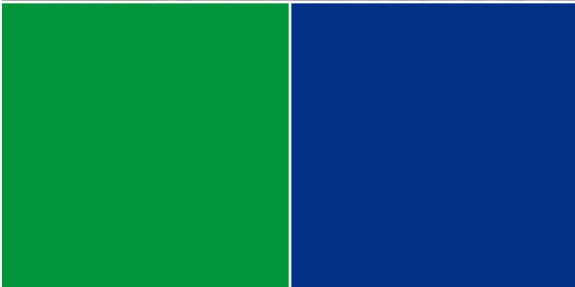

Physical and financial products to optimize your energy needs, hourly to longer terms, including tailored energy solutions for up to 10 years.

Hedging products to provide stable and consistent power costs over the long term.

Financial risk tools to manage dispatchable or peak load requirements.

Operational excellence tools to manage dispatches and operations of plants operating 24 hours.

Power Marketing

Experience You Can Count On

From our office in Calgary, TransCanada provides wholesale power supply and invoicing services in Alberta.
