

TransCanada in Ontario

Natural Gas Pipeline Infrastructure

Canadian Mainline

Length of Pipeline (km)	8,079
Meter Stations	168
Compressor Stations	41

Power Generation

Bruce Power, Halton Hills, Portlands Energy

Total Nominal Generating Capacity	4,057 MW
-----------------------------------	----------

Economic Impact (2017)

Property Taxes Paid	\$90.25 million
Provincial Taxes	\$10.69 million
Community Investment	\$1.74 million
Number of Employees ¹	340
Salaries	\$46.99 million
Number of Landowners ²	14,580

(1) Includes full-time and part-time employees

(2) Landowners are private or public individuals/organizations who may have multiple land titles

With more than 65 years' experience, TransCanada is a leader in the responsible development and reliable operation of North American energy infrastructure including natural gas and liquids pipelines, power generation and gas storage facilities. TransCanada operates one of the largest natural gas transmission networks that extends more than 91,900 kilometres (57,100 miles), tapping into virtually all major gas supply basins in North America. TransCanada is a leading provider of gas storage and related services with 653 billion cubic feet of storage capacity. A large independent power producer, TransCanada currently owns or has interests in approximately 6,100 megawatts of power generation in Canada and the United States. TransCanada is also the developer and operator of one of North America's leading liquids pipeline systems that extends approximately 4,900 kilometres (3,000 miles), connecting growing continental oil supplies to key markets and refineries. TransCanada's common shares trade on the Toronto and New York stock exchanges under the symbol TRP.
