

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Minimum PPE requirements for when flame resistant (FR) is NOT required in US Gas

Class E Type 1 or Type 2 Hard Hat

A minimum of short sleeves is required (e.g., 3-4 in. / 7 - 10 cm)

High visibility is selected based on site specific hazards

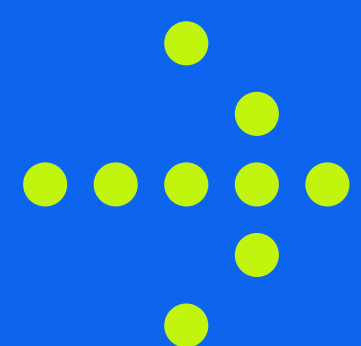

Foot Protection must be high-cut, over the ankle, and provide ankle support (i.e., approx. 6 in./15 cm), with impact protection and electrical shock resistance

Single or double hearing protection is required based on noise levels

Safety glasses or eye glasses with side shields

Clothing must be primarily made of natural fibers such as tight-weave cotton

Pants are required to cover legs down to the ankles

Before I don any of my PPE, I will always check to ensure it is in good condition because I know it's my last line of defense.

I will always complete a job risk and hazard assessment (i.e., JRA and JSA) to determine the right PPE for the job

I will don the appropriate respiratory protection equipment based on the hazards identified.

I will follow any additional Jurisdictional requirements for my working area that exceed PPE standard.
